World Class - Practical

Capabilities

Service	Description
PLC	Hardware and software design
HMI/SCADA	Hardware and software design
Industrial Networks	Hardware and configuration design
Control Panels	Design and construct
Electrical Drawings	Schematics, single line, panel layout, termination and cable schedule, test documents
Functional Descriptions	Hardware and software design
Machinery Design	3d modelling and detailed 2d for construction
Product Development	3d modelling, bill of material and part pricing
Turnkey Projects	Detailed design, manufacture, deliver and commission
Home Automation	Design, control panel build, touchscreen, 3G modem, iphone, ipad, install and test
Safety System	Design, construct and commission
Switchboards	Design, construct and commission
Testing	Factory and site acceptance test
Motion Control	Variable speed drives, servo systems, software design
Vision Systems	Camera, lighting and software design, construct and commission

What We Do

At Rotation Automation, we design innovative systems which are always practical and cost effective. Using the latest advances in products and software we bring automated processes to many and varied industry sectors.

Safety, Quality and Customer Satisfaction are the three prime drivers for our staff when designing and delivering small to large systems alike.

Ring **1300 886 187** to discuss your Automation and Engineering needs.
